

Scott Willeke

Objective To work in a fast paced, high technology environment with intelligent people that excite my passion for technology, demanding work ethic, and talent.

Technical Summary Built on an early technical background in computer hardware and networking to become an accomplished programmer of commercial software products. Developed years of experience as a passionate contributor to a commercial software development team with extensive involvement throughout the entire software product development lifecycle.

Software Development Experience

- Extensive programming experience with advanced C#.NET projects specializing in commercial component development focused on reporting and data analysis since 2001.
 - Integral member with extensive participation in ideas, requirements specification, component API design, development, documentation, testing, marketing, sales and deployment, and customer satisfaction.
 - Experience with many programming technologies including: C#, ASP.NET, Visual Basic (VB.NET, VB 4-6, VBA), XML, XPath, .NET/COM Interop, Managed C++ .NET, ADO.NET, Visual Studio Extensibility, HTML, JavaScript, CSS, DHTML, Regular Expressions.
 - Created ASP.NET web controls and HttpHandler components used in commercial products.
 - Developed components used for generating reporting documents in a variety of file formats including PDF, Excel's Binary File Format (BIFF), RTF, MIME, EMF/WMF, HTML, and bitmap image formats.
 - Extensive use of ActiveX/COM components, ASP, Server, and Scripting (JavaScript, JScript, VBScript).
 - Developed a Commercial Print Preview and Printing component product in Java using AWT and converted it to Swing.
 - Provided troubleshooting and debugging customer support to other programmers in a large variety of Windows environments and languages including C#, VB.NET, ASP.NET, C++, Visual Basic, Java, JavaScript, HTML, ASP, Delphi and more.
 - Created Technical Documentation on ActiveX Component API's in WinHelp and HTML Help.
 - Created and Maintained Windows Installations in Wise Install Master and Windows Installer.
 - Experience giving technical presentations on developer products at industry conferences to large groups.
 - Grew a Technical Support & Software Testing department from zero to seven members in a high paced, demanding startup environment.
 - Trained and managed several recent college graduates to methodically test and provide technical support to programmers for ActiveX Components used in Visual Basic, ASP, and web pages.
-

Databases

- Development experience accessing databases using ADO.NET, ADO/OLEDB, RDO, DAO, ODBC, OLEDB for OLAP, and JDBC.
 - Advanced SQL experience with some experience in MDX (Microsoft's OLAP/Analysis Services Technology).
-

Internet Development

- Years of corporate web site development using HTML, JavaScript, ASP, and ASP.NET.
- Developed corporate web site for several years, which populated many pages from SQL Server with ASP, ASP.NET, ADO & ADO.NET, and custom components. Experience working with many versions of Netscape/Mozilla and Internet

Explorer.

-
- Hardware & Networking** Responsible for internal technical systems which included:
- Active Directory.
 - Multiple Windows Server 2003, 2000 and NT4 servers; software and hardware.
 - Public Web, FTP, News, Mail, file servers, firewall, VPN and security, hosted on multiple bonded T1 Internet connections.
 - Desktop deployment and maintenance with Windows XP, Windows 2000, NT4, 95, 98 with 15+ employees.
 - Firewalls and Ethernet switched routing.

Professional Work History August 1996 – Present
Data Dynamics
Columbus, Ohio
<http://www.datadynamics.com>

Data Dynamics is the developer of top selling commercial .NET and ActiveX Components sold primarily to the Visual Basic market. The products are top sellers throughout the industry accumulating more than 10 awards over the years. The products can be found at any Visual Basic component reseller such as www.ComponentSource.com. Some of the product names are ActiveReports, SharpUI, SharpGrid, ActiveBar, ActiveSizer, and DynamiCube.

1992-1996
Burkey & Associates

Burkey & Associates was a premier network computing pioneer. Expertise in Novell, Microsoft and other high end networking products was unmatched.
